Smart Cities Marketplace Introduction

The Smart Cities Marketplace is an EU initiative which aims to ENGAGE with cities and towns of all sizes to deliver more sustainable urban environments and offers all the information needed to EXPLORE solutions, SHAPE climateneutral and smart city projects, and successfully close a DEAL for financing them.

The Smart Cities Marketplace has thousands of followers from all over Europe and beyond, many of which have signed up as a member. Their common aims are to improve citizens' quality of life, increase the competitiveness of European cities and industry as well as to reach European energy and climate targets.

*„The Smart Cities Marketplace plays an important role in speeding up the just and green transition of cities and towns in Europe, focusing on small and mid-sized cities. It helps improving citizens' quality of life, increasing the competitiveness of European cities and companies, and reaching European energy and climate targets.
The Smart Cities Marketplace lets you explore project ideas and key practical knowledge, provides technical support to shape your project idea, and offers opportunities to close a financing deal, all in one place. “*

The Smart Cities Marketplace provides you with vital knowledge to support you in moving your smart city ambitions forward. In our Explore section you will find use cases from nearly 90 successful European projects sharing solutions implemented in both small and medium-sized towns and in metropolises such as London, Barcelona and Vienna. Many projects have reported their core data using our Self-Reporting Tool, to be picked up and developed into bankable solutions.

The Smart Cities Marketplace offers a wealth of information on European projects supporting your Smart City ambitions. The projects have tackled topics such as energy efficiency in buildings, digital infrastructure, Positive Energy Districts, smart urban mobility, and a wide range of other topics of relevance for the sustainable urban transition. More than 185 demonstration sites from nearly 90 projects are included and provide you with all the information you need to explore the possibilities of your Smart City ideas.

→ Explore Self-Reporting tool

The Self-Reporting Tool (SRT) is a tool for EU-funded Smart City projects to report on projects' relevant outputs and insights. The users of the Self-Reporting Tool (project coordinators, for example), are uploading information on the interventions carried out in their project, varying from newly constructed highly energy efficient buildings to refurbishment of existing housing stock, introduction of renewable energy technology as well as mobility and ICT actions.

The reported information provides you with real-life data from monitoring of the demonstrations, allowing you to obtain some first-hand information. It will help you to explore the impact of technologies and provide you with data from implemented solutions.

Solution Booklets

Our solution booklets are written by leading Smart City experts and explain a technology or a concept and its potential for application in a city or community. On 30 pages they provide you with an overview and allow for a deeper investigation of what the specific technology or concept includes, and what it could mean for your city, town or community.

The booklets' subjects range from technical issues, like district heating and cooling networks or e-buses, to non-technical matters like citizen engagement or implementing sustainable and smart city strategies. All booklets contain a number of relevant examples, descriptions of cases and useful references.

→ [All Solution Booklets](#)

→ Shape Policy Papers

Based on an extensive analysis of Smart City projects and relevant literature, important policy challenges have been identified and investigated in detail. The resulting insights are collected in thematic papers that clarify the state of the art and formulate recommendations for future implementation. The recommendations are useful for policy makers as well as other actors engaged in sustainable and Smart City projects. The most recent policy papers have the following subjects:

Challenges and opportunities for the replication of Smart City solutions:

*Why may replication (not) be happening -
Recommendations on
EU R&I and regulatory policies (2018)*

Smart City Guidance Package

Welcome to the Smart City Guidance Package – this guideline is available as a full roadmap and as a summarised version including the key financial aspects of the different stages and steps.

Both publications help to fast-track financially viable urban projects in an integrated and inclusive way. They provide a roadmap for this purpose summarising the different stages of developing a coherent urban development process and offer a checklist for the different steps of each stage. They also include advise on planning various accelerating actions supporting you in achieving more impact locally through replication and scaling up of solutions for Climate-Neutral and Smart Cities.

Focus and Discussion Groups

The Smart Cities Marketplace would like to introduce the concept of Discussion and Focus groups to guide peer exchange and support cities in their smart development.

Two group types are foreseen:

Discussion groups are fora where the participants can exchange experience, cooperate, support, and discuss a specific theme.

Contrary to the participants of the online Discussion group fora, the participants of Focus groups meet and debate their ideas in an on-site and online discussion setting (e.g., webinar, workshop). Communication and cooperation are supported by a member of the SCM secretariat, a secretarial support team, and through the Smart Cities Marketplace community space

Investor Network

The Smart Cities Marketplace Investor Network is a growing group of investors and financial service providers with capital ready to be invested in Smart City projects.

Investor network members list

[smart-cities-marketplace.ec.europa.eu/
matchmaking/investors](https://smart-cities-marketplace.ec.europa.eu/matchmaking/investors)

Become a member of the investor network

[smart-cities-marketplace.ec.europa.eu/
investor-information-form](https://smart-cities-marketplace.ec.europa.eu/investor-information-form)

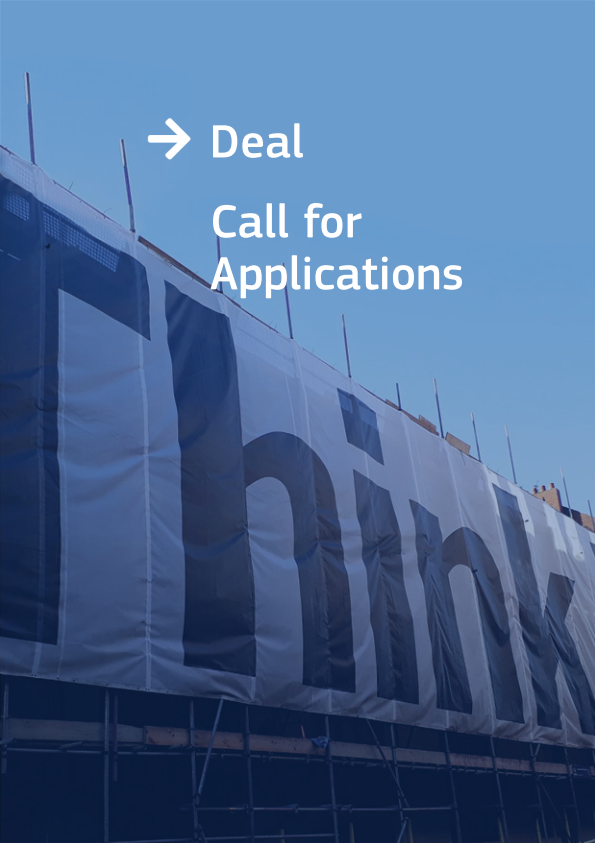

The members of the Network facilitate and/or provide financing to Smart City projects supporting the transition towards a low carbon, resource efficient and competitive economy.

Cities, project developers and other Smart City actors seeking project financing are invited to submit their project idea in the frame of the mentioned call for projects.

The Smart Cities Marketplace team will then conduct the fine-tuning process, making the match between the investors' profiles and the projects' concept notes.

In addition, regular matchmaking events provide an opportunity for investors and project representatives to connect.

→ Deal
Call for
Applications

The Smart Cities Marketplace provides regular matchmaking services to help cities and city consortia with their project proposals to achieve climate neutrality. On a regular basis calls for applications are published. These aim to help with identifying projects, or further shaping project ideas to become bankable through tailor-made technical assistance. Matchmaking services also aim to help investors to find smart city proposals.

→ **See our guidance document**

smart-cities-marketplace.ec.europa.eu/sites/default/files/2023-02/SCM_Guidance_CallForApplications_pdf.pdf

- **Are you looking for investments to realise your energy, transport & mobility or digital solutions?**
- **Is your city ready to (re)develop certain areas?**
- **Is your company working on smart city projects/ services?**

If you can answer with “yes” to any of the above questions or if you think that your project concept is mature enough to be pitched to an investor, don’t wait any longer and submit your idea using the intake form!

What happens if your project concepts are not ready yet?

No problem! The Smart Cities Marketplace offers plenty of proven solutions to explore and be inspired by. Furthermore, you can engage with our community to shape your project idea such that it becomes mature enough to be matched with the investors. In addition, you can join a series of webinars, matchmaking events and Finance Masterclasses to help you shape your project, please see our [website](#) for more information.
